EDUCATION

Bharati Vidyapeeth's College of Engineering, GGSIPU, New Delhi, India <i>B.Tech. in Information Technology with Minor Specialisation in AIML</i>	CGPA: 8.8 2022 – 2026
Bhatnagar International School, New Delhi, India <i>Class 12th</i>	Percentage: 76 2021–22
Bhatnagar International School, New Delhi, India <i>Class 10th</i>	Percentage: 87 2019–20

TECHNICAL SKILLS

Programming Languages: Java , Python, HTML, CSS, Java Script, Basics of C and C++, ReactJS

Frameworks: Flask, Tensorflow, Pytorch, Streamlit, Langchain, Langsmith, Hugging Face

Courses Studied: OOPs, DBMS, OS, TOC, DSA, CN, AI, SE

AI & Machine Learning: Numpy, Pandas, Matplotlib , Scikit-learn, Seaborn

Database Management: MySQL

Version Control: VS Code, Git, Github, PowerBI, Figma, Canva, Vercel, PyCharm, Render

EXPERIENCE

Internship Training in Data Science <i>Certification by VeeyoTech</i>	July 2024 Delhi
• Gained expertise in Python, SQL & Power BI for data analysis and model evaluation • Value Vision made a house price predictor in this using Python Library Scikit-learn,matplotlib. 	
Machine Learning Intern at Unified Mentor (Remote) <i>Certification By Unified Mentor</i>	May- Aug 2025 Delhi
• Developed projects like animal classification, mobile price prediction, forest cover prediction, liver cirrhosis prediction and achieved the markable accuracy on all the projects. 	

PROJECTS

RefiNet — Python, StreamLit, Pytorch, MSAFN(Custom CNN) 	May-June 2025
• This project aims to compress a powerful image enhancement model (MSAFN) into a lightweight student model (LightMSAFN) using knowledge distillation • Achieve high SSIM (0.9792) and PSNR (51 dB) in a compressed model.	
V-Secure An Intelligent Data-Driven Model for Intra-Vehicle Communication Python, Flask  Mar 2025	
• Developed an intelligent system to detect DoS, fuzzy, RPM spoofing, and gear spoofing attacks, achieving a 99% reduction in false positives. • Leveraged 7 deep learning and 3 machine learning models, live car hacking news for real-time threat detection and intrusion prevention.	
ReAct-Drive — Python, OpenCV 	May 2025
• Built a real-time driver drowsiness and yawning detection system using OpenCV, enhancing safety through continuous visual monitoring. • Integrated alert mechanisms and Google Maps API to suggest nearby rest locations, enhancing driver safety through intelligent assistance.	

CERTIFICATIONS AND ACHIEVEMENTS

- **Best NSS Volunteer Award**
- **Excelsior Award 2025**
- **DSA in JAVA- CODING NINJAS**

POSITION OF RESPONSIBILITY

IEEE BVCOE - GAMMA Head, Computer Society(CS) Logistic Head	May 2024 - Present
• Worked as an active member in organizing team for WIEHack 5.0, a highly successful 36 hours hackathon that attracted more than 1800 students from India and 31+ countries. • Organized Design Verse for CS as Logistic head.
